

SILICONE LUBE (DRY LUBE)

Wynn's SILICONE-LUBE reduces friction between surfaces.

PROPERTIES

- Lubricates plastic, wood, rubber and metal.
- Provides lubrication to all sliding surfaces which require a clean invisible lubrication.
- Protects against rust and corrosion.
- Provides dry lubrication.
- Reduces static electricity.
- Prevents sticking of materials.
- Is water and moisture repellent.
- Does not stick, stain or oxidize.
- Guards against wear of hard on soft and soft on hard materials.
- Waterproofs.

APPLICATIONS

- On different material combinations: plastic on metal, on wood, metal on metal, rubber mouldings, etc.
- Prevents jamming or freezing of windows, doors, sliding doors, etc.
- On machines and for industrial operations
- For use on moulds, machines, curtain runners, drawers, electric sunroofs etc.

DIRECTIONS

- Shake can well before use.
- Spray treatment area with a light coating.

NOTE

Do not use on material that will be painted or glued afterwards.

Contains silicone – not suitable for use in bodyshops or near painting operations
