

WHITE GREASE

Wynn's WHITE GREASE is a tenacious, high performance, calcium based, PTFE-enhanced lubricant. It provides visible, clean protection and lubrication.

PROPERTIES

- Lubricates any moving or static metal surface that requires a visible, clean grease.
- Provides long-lasting lubrication for exposed areas, such as gate, door, bonnet and boot hinges.
- Lubricates plain-bearing pumps, car locks, linkages and open gears.
- Fully water resistant
- Protects against rust and corrosion.
- Resistant to high temperatures (140°C) and oxidation.

APPLICATIONS

- Wynn's WHITE GREASE can be used in all normal grease lubricated applications requiring a visible lubricating film.
- Lubricates hinges of doors, engine bonnet and boot.
- For the lubrication of car locks, linkages, open gears.
- Lubricates chains, transmission gearing and joints of bicycles and motor-cycles.
- Safe for use in bodyshops – does not contain silicone

DIRECTIONS

- Ensure the surface or component to be treated is free of grease, clean and dry.
- Shake can well and spray from a distance of 8"-12".
