Wynn’s High Performance Diesel System Treatment is a chemical treatment that has a triple action:

1) Increases engine performance
2) Reduces fuel consumption
3) Reduces black smoke

Immediately improves combustion, which enhances engine performance and improves acceleration.

Reduces fuel consumption.

Reduces black smoke.

Complete burn-off of soot particles during driving.

Cleans and protects diesel injection systems.

Protects against oxidation and corrosion.

Prevents deposit formation.

Harmless for all after treatment systems.

Recommended for all diesel engines (new as well as used).

Add contents of one bottle of 500 ml to a full tank of fuel.

For best results, use in every 3rd tank of fuel.

*Bottle is also suitable for capless fuel fillers.*
