DIESEL PRE-EMISSION TEST TREATMENT

Fast acting treatment

Wynn's Diesel Pre-Emission Test Treatment is a strong, specially formulated treatment to meet new emission testing regulations. Containing 4 specific emission reduction elements, cleaning through the entire fuel system with a highly concentrated formula to restore combustion efficiency, reducing black smoke, exhaust emissions and soot particles.

Properties

- ✓ Specially formulated to pass new emission testing regulations.
- ✓ Reduces exhaust emissions and soot.
- ✓ Reduces black smoke.
- ✓ Improves combustion, engine performance and fuel economy.
- ✓ Cleans injectors, restoring injector spray pattern.
- ✓ Assists cleaning of the entire fuel system including diesel oxidation Catalyst and diesel Particulate Filter.

Applications

- ✓ For all diesel engines, including common rail and pump injector engines.
- ✓ Compatible with all diesel system components including Catalytic Converters, Diesel Particulate Filters and SCR systems.
- ✓ For diesel and bio diesel up to B30.

Directions

- ✓ Add one bottle of 500 ml to the diesel fuel tank containing a minimum of 30 litres of fuel.
- ✓ Drive at least 50 km on the motorway before taking the vehicle to the official emission test.
- ✓ Can be used as a curative treatment in the event of an emission failure.
- ✓ For best results, use every 3rd tank filling and use 150 km before MOT test.
- ✓ Results may vary due to service history, vehicle age and mileage.
