UNIVERSAL DEGREASER

WYNN’S UNIVERSAL DEGREASER is a heavy-duty formulation designed to remove, oil, grease, tar and waxes from motorcycle chains, engines, component parts, machinery, bodywork, tyres, rims, tools, etc.

DESCRIPTION

WYNN’S UNIVERSAL DEGREASER is a water-based formula with the exclusive NON-DRIP effect, designed to remove grease from all types of surfaces. It is water soluble for an easier and safer cleaning.

Its NON-DRIP feature allows a precise application, a much higher contact time between the product and the surface area to clean, either vertical or horizontal, and consequently, an optimal, faster and easier removal of any type of dirt.

PROPERTIES

- Universal degreaser, applicable to most of the surfaces found in vehicles.
- Easy to apply and remove after softening or dissolving the stuck dirt.
- Water soluble for a perfect finish, free of dirt.
- Non-Drip formulation for a deeper, optimal cleaning. The product stays in place for the necessary time to either soften or remove the targeted dirt, no matter if the surface is not in horizontal position.

INDICATIONS FOR USE

- Spray the product (from an adequate distance, at least 20-30cm) on to the surface and let the product work for 2-3 minutes.
- Rinse gently with water or with the help of an adequate brush or cloth if considered opportune.
- Repeat if necessary.
- Do not apply to hot surfaces or areas which could be damaged by solvents.
- For a precise application, spray directly on to the cloth and apply to the surface to be treated.
- If in doubt, test on a non-visible part first.
TECHNICAL CHARACTERISTICS

- Appearance and colour: Whitish slightly viscous liquid
- Density (g/ml): 1.00
- pH: 10±0.5
- VOC (%): 5

NOTE: These data represent mean values measured after different tests. Given the wide variety of operating conditions, these data do not constitute a basis for specification determination.

REFERENCE & PACKAGING

- PN41103
- Units per box: 6 units
- Capacity: 500ml.
